Call for Applications

Doctoriales « Économie & Sociologie »

Strasbourg 2026

The "Economics & Sociology" PhD-workshop ("Doctoriales Économie & Sociologie") aims at contributing to the advancement of the work of doctoral students and young doctors who work, from a social science perspective (sociology, economics, political science) on economic topics: firms, consumption, markets, innovation, public services, economic policies, currencies, finance, public and private debts, accumulation of economic capital, platformization of the economy, etc. The meeting aims to showcase the renewal of research in economic sociology, in political economy and institutional economics, as well as the articulation of these different approaches to economic facts.

The "Economics & Sociology" PhD-workshop will take place on **Thursday, October 15th and Friday, October 16th, 2026 at the University of Strasbourg.**

The main goal of this workshop is to provide a space for young researchers to present their work-in-progress and to benefit from the feedback of sociologists, economists and political scientists interested in these issues. It is open to all doctoral students who are already advanced in their work, and to young doctors who have defended their dissertation after September 1st, 2023.

Work languages will be both French and English.

For this edition, research papers focusing on the European dimensions of economic issues are especially invited. They may examine how EU institutions influence corporate behavior, market structures, and economic policies. The papers may also discuss the importance of transnational flows of people, assets, ideas, and market devices, or they may compare national or regional areas in Europe. However, the European focus is not exclusive, and papers that do not specifically engage with the EU-level or European issues are of course welcome.

Calendar

To participate to the workshops, doctoral students must submit a detailed proposal (between 8.000 and 10.000 characters, including references) to the following address **doctoriales.socioeco@gmail.com** **by April 17th 2026**.

Papers should develop one aspect of the dissertation that the author wishes to discuss. Theoretical framework, methods and data should be presented. **It is recommended that applicants submit a paper that could be ultimately published in a scientific journal**, rather than a raw chapter or a general summary of their dissertation.

The communication may be a step in the publication process. With this in mind, following the October 2026 conference, the *Revue Française de Socio-Economie* will renew its call for papers from "Doctoriales" participants to award the Prix des Doctoriales – RFSE. The aim of the prize is to promote, through fast-track publication, an article (in French) based on doctoral research on economic topics.

The organizing scientific committee will review the applications and will notify the participants by mid-May 2026. This evaluation will comply with the principles of the RT12 charter. Applications will be evaluated anonymously by members of the organizing committee to promote theoretical, methodological, and disciplinary diversity while respecting gender balance and preventing conflicts of interest. Evaluations will focus on the following four criteria: (1) the key idea of the paper, (2) the empirical material used, (3) the theoretical corpus discussed, (4) the application's interest for the broader community of social science scholars studying the economy.

Papers (60.000 characters maximum spaces included) must be sent to **doctoriales.socioeco@gmail.com** by **September 23rd, 2026** so that the discussants have time to prepare their discussion.

Organizing committee

Gabriel Alcaras (RT11, Post-doctorant, Médialab, Sciences Po)
Leslie Belton Chevallier (RT11, CR, LVMT, Université Gustave Eiffel)
Clément Bellanger (RT12, Doctorant, CSO, Sciences Po)
Thomas Collas (RT12, MCF, SAGE, Université de Strasbourg)
Aude Danielli (RT11, MCF, CERREV, Université de Caen)
Chloé Daveux (RT12, Doctorante, IRISSO, Université Paris-Dauphine)
Hélène Ducourant (RT11, MCF, LATTS, Université Gustave Eiffel)
Quentin Gervasoni (RT11, Post-doctorant, GREDEG, Université Nice Côte d'Azur)
Charlotte Janson (RT12, Doctorante, IRISSO, Université Paris-Dauphine)
Marion Michel (RT11, Post-doctorante, CARISM, Université Panthéon-Assas)
Olivier Pilmis (RT12, CR CNRS, CSO, Sciences Po)
Melchior Simioni (RT12, MCF, SAGE, Université de Strasbourg)
François Schoenberger (RT12, Post-doctorant, Blavatnik School of Government, University of Oxford)
Marine Spor Ceccaldi (RT11, Post-doctorante, CEESE, Université Libre de Bruxelles)
Marie Trespeuch (RT12, MCF, GEMASS, Sorbonne Université)
